Introduction	1
What's in the Book?	1
This Book's Special Features	2

I MICROSOFT WORD TRICKS

1 Text Tricks	7
Keeping Table Headings in View	7
Summing a Column in a Table	9
Calculating Tax in an Invoice Document	11
Highlighting All Instances of a Word or Phrase	13
Using AutoCorrect to Insert Your Signature	14
Using AutoCorrect to Enter Boilerplate Text	15
Saving Boilerplate as an AutoText Building Block	16
Creating a "Click-and-Type" Text Placeholder	18
Asking a User for Text Input	19
Creating a Dynamic AutoCorrect Entry	20
Adding Dummy Text to a Document	21
Using the RAND Function	21
Using the Repeat Command	22
Inserting a Hyperlink in a Document	23
Creating a Hyperlink Using AutoCorrect	24
Creating a Hyperlink from Scratch	25
Pasting a Hyperlink in Word	26
Displaying Sentence Word Counts	26
Finding the Longest Sentence in a Document	28
Toggling Hidden Codes and Text	30
Creating a Custom Spell Check Dictionary	31
From Here	33
2 Formatting Tricks	35
Quickly Modifying the Normal Style	35
Setting Up the Quick Style Gallery to Suit the Way You Work	36
Changing the Document Map Formatting	38
Selecting Text with Similar Formatting	39
Copying Formatting from One Section to Another	40
Comparing the Formatting of Two Text Selections	40
Removing Formatting with Precision	41

Replacing One Style with Another	43
Applying Formatting from the Keyboard	44
Specifying a Custom Bullet Image	47
Creating an Inline Numbered List	49
Converting Uppercase Words to Another Case	51
Converting Smart Quotes to Straight Quotes	53
Formatting a Single Column in Tab-Separated Text	55
Ensuring Consistent Document Formatting	56
Wrapping Text Around an Image	56
Adding a Drop Cap	58
From Here	59
3 Document Tricks	61
Recovering More of Your Work with a Shorter AutoRecover Interval	61
Automatically Saving Your Work Frequently	62
Closing a Document Without Saving	64
Closing All Your Open Documents	65
Making Backups as You Work	66
Showing More Items on the Recent Documents List	68
Opening the Most Recently Used Document at Startup	68
Clearing the Recent Documents List	69
Creating and Opening Document Workspaces	70
Automatically Prompting for Document Properties	72
Creating a Trusted Location for Documents	73
Viewing Total Editing Time Updated in Real-Time	75
Calculating Billable Time Charges	77
Locking Document Formatting	77
Preventing Untracked Changes	79
Setting Up a Document for Structured Editing	80
Inspecting a Document for Personal Information	84
Viewing Two Documents Side by Side	85
Updating All Fields Automatically	86
From Here	87
4 Page Layout Tricks	89
Displaying Text in Multiple, Linked Text Boxes	89
Creating Jump Text	91
Creating a Custom Watermark	93
Giving a Document a Parchment Paper Background	93

Displaying a Document with a Random Texture Background	94
Displaying Text with Line Numbers	95
Using Continuous Numbers in Two Separate Numbered Lists	97
Using Multiple Page Number Formats in the Same Document	98
Making the First Page Header and Footer Unique	100
Using Different Odd and Even Page Headers	100
Adding a Gutter for a Bound Document	101
Creating Custom Outline Levels	102
From Here	103

II MICROSOFT EXCEL TRICKS

5 Formula and Function Tricks	107
Allowing Only Certain Values in a Cell	107
Looking Up a Value in a Discount Rate Schedule	109
Looking Up a Customer Account Number	111
Generating Account Numbers	112
Generating Random Numbers to Test Worksheet Models	114
Removing Excess Spaces from a Cell	118
Removing Unprintable Characters from a Cell	119
Extracting a Person's First Name or Last Name	121
Building an Accounts Receivable Aging Worksheet	123
Converting Mainframe Dates to Excel Dates	125
Calculating Tiered Bonuses	126
Calculating the Number of Weekdays Between Two Dates	126
Determining the Fiscal Quarter in Which a Date Falls	128
Setting a Product Price Point	129
Calculating the Principal and Interest for a Loan	130
Determining How Much You Can Borrow	134
Calculating the Future Value of an Investment	134
Deciding Whether to Buy or Lease	136
From Here	138
6 Workbook and Worksheet Tricks	139
Applying Text or Formatting to Multiple Worksheets	139
Annotating a Worksheet with Comments	140
Removing All Comments from a Workbook	142
Keeping Track of Worksheet Changes	143

Sharing a Workbook with Other Users	145
Preventing Users from Changing Parts of a Worksheet	148
Adding a Live Stock Price Quote to a Worksheet	149
Automatically Sorting a Range After Data Entry	151
Transposing Range Rows and Columns	152
Automatically Opening a Workbook at Startup	152
Creating a Workspace of Workbooks	153
Creating a Workbook with a Specified Number of Sheets	154
Selecting A1 on All Worksheets	155
Selecting the “Home Cell” on All Worksheets	156
Selecting the Named Range that Contains the Active Cell	157
Saving All Open Workbooks	159
Using Dialog Box Controls to Input Data	160
From Here	163
7 Data Analysis Tricks	165
Using a Range Snapshot to Watch a Cell Value	165
Using a Watch Window to Watch a Cell Value	166
Calculating Multiple Solutions to a Formula	167
Plugging Multiple Input Values into a Formula	171
Determining the Break-Even Point	174
Optimizing Profit and Margin	177
Highlighting Cells Above or Below a Certain Value	182
Highlighting Values Below the Median	184
Analyzing Cell Values with Data Bars	186
Applying Percentile-Based Icon Sets	188
From Here	193
8 Chart Tricks	195
Using Worksheet Text in a Chart	195
Plotting the Average on the Value Axis	198
Stacking a Picture as a Bar Chart Data Marker	201
Charting a Dynamic Range	202
Automatically Expanding a Chart to Include New Data	206
Displaying a Second Vertical Axis	206
Exploding a Slice from a Pie Chart	207
Charting Small Values with a Bar of Pie Chart	208
Creating a Scrolling Chart	209

Plotting a Best-Fit Trendline	213
Plotting Forecasted Values	215
From Here	217

III MICROSOFT POWERPOINT TRICKS

9 Slide and Presentation Tricks	221
Converting a Word Outline into a PowerPoint Presentation	222
Inserting Custom Text into the Slide Footer	224
Creating Custom Bullets	226
Replacing Fonts Throughout a Presentation	228
Recoloring a Picture to Match Your Presentation	229
Drawing Shapes at Evenly Spaced Intervals	230
Using Drawing Guides to Precisely Align Objects	231
Creating a Custom Slide Layout	232
Hiding a Slide Master Object on One Slide	235
Using Multiple Slide Masters	236
Creating a Custom Blank Presentation	237
Maintaining a Slide Library	239
Converting a Slide into an Image	242
Creating a Summary Slide with a Macro	244
Using Word to Custom Format Handouts	246
From Here	247
10 Animation Tricks	249
Applying a Custom Sound to a Transition	250
Creating a Custom Animation	251
Using Triggers to Display and Hide a Slide Object	255
Making Bullets Display Individually	257
Animating Chart Elements	260
Animating an Organization Chart	261
Uncovering Parts of an Image, One at a Time	262
Animating Separate Elements of a Clip Art Image	263
Playing a Video to Introduce a Slide	268
Emphasizing the Current Bullet Point	269
Adding Scrolling Credits	272
From Here	273

11 Slide Show Tricks	275
Rehearsing a Slide Show	275
Assigning Slide Times with a Macro	278
Calculating the Average Slide Time	279
Adding Narration to a Slide Show	281
Setting Up an Automatic Slide Show	282
Playing CD Tracks During a Slide Show	283
Creating a Custom Slide Show	285
Presenting a Slide Show Using Two Monitors	286
Controlling a Slide Show from the Keyboard	288
Linking to a Hidden Slide	290
Linking to the Last Slide Viewed	292
Protecting a Presentation by Distributing It as a Slide Show File	292
Publishing a Slide Show to the Web	294
Enabling Animations on the Web	296
Copying the Presentation to a CD	297
From Here	298

IV MICROSOFT OUTLOOK TRICKS

12 Email Tricks	301
Customizing the Inbox Message Fields	302
Setting the Junk E-mail Protection Level	305
Blocking Messages from a Particular Person or Domain	308
Blocking Foreign or Non-English Messages	308
Avoiding Viruses by Reading Mail in Plain Text	309
Allowing a Blocked File Type as an Attachment	311
Setting a Message Follow-Up Reminder	315
Supplementing a Reminder with an Email Message	316
Creating Custom Color Categories	318
Applying Colors to Messages from Specific Senders	320
Downloading Mail for a Single Account Using Multiple Computers	321
Creating an Email Shortcut for a Recipient	322
Having Replies Sent to a Different Address	324
Using a Different Outgoing (SMTP) Mail Port	325
Prompting to Save Messages in the Sent Items Folder	327

Setting Up a Password-Protected Folder	328
Cutting Your Mailbox Down to Size	331
From Here	332
13 Calendar and Contacts Tricks	333
Starting Outlook in the Calendar Folder	334
Changing the Number of Days That Calendar Displays	334
Customizing the Day View's Time Scale	337
Adding Another Time Zone to the Day and Week Views	337
Customizing Calendar's Holidays	339
Printing a Blank Calendar	341
Using Natural-Language Dates and Times	343
Customizing the To-Do Bar	344
Color-Coding Appointments Automatically	346
Editing Multiple Contacts at Once	347
Calling a Contact	349
Adding a Contact Picture	351
Displaying a Map for a Contact's Address	352
Printing a Phone Directory of Your Contacts	353
Sharing a Folder with Other Users	354
Sharing a Folder via Email	354
Sharing a Folder via Microsoft Exchange	356
Sharing a Folder with Delegate Access via Microsoft Exchange	358
Viewing Another User's Shared Folder	359
Working with Another Email Account as a Delegate	360
From Here	361

V MICROSOFT ACCESS TRICKS

14 Table and Query Tricks	365
Validating Data Entry	365
Using an Input Mask to Ensure Consistent Data Entry	369
Setting a Default Value for a Field	373
Requiring a Value for a Field	374
Ensuring That No Duplicate Values Display in a Field	374
Selecting a Field Value from a List	376
Entering a Field at the End for Easier Editing	378

Inserting Hyperlinks into a Table	379
Importing Data from an Outlook Folder	380
Collecting Access Data via E-mail	384
Creating the Access Data Collection Message	385
Working with Access Data Collection Replies	386
Finding Duplicate Records with a Query	387
Selecting the Top Values with a Query	388
Adding a Custom Calculated Column to a Query	388
Calculating Inventory Value	391
Calculating Order Totals	392
Prompting for Query Criteria	394
From Here	397
15 Form and Report Tricks	399
Opening a Form Automatically When You Load a Database	399
Automatically Moving to the Last Record When You Open a Form	400
Creating a Switchboard Form	402
Using a Toggle Button for a Yes/No Field	403
Preventing Changes to the Form's Data Source	405
Customizing the Form's Tab Order	405
Creating Shortcut Keys for Form Controls	406
Applying Formatting to Special Form Values	408
Creating Calculated Form Controls	409
Creating Custom Report Groups	411
Inserting Page Numbers in the Report	414
Inserting the Current Date in a Report	415
Adding Page Breaks after Report Sections	416
Preventing Widowed Report Records	417
Starting Report Sections at the Top of a Row or Column	417
Creating a Multiple-Column Report	418
Creating Mailing Labels	421
Distributing a Report Snapshot	424
From Here	425

APPENDIXES

A Working with VBA Macros	429
Activating the Ribbon's Developer Tab	430
Running a VBA Macro	430
Using the Example Code	431
Using the Macro Name List	431
Assigning Shortcut Keys to Word Macros	431
Assigning Shortcut Keys to Excel Macros	433
Creating a Quick Access Toolbar Button for a Macro	434
Using a Function Macro	435
Recording a VBA Macro	436
Recording a Word Macro	437
Recording an Excel Macro	438
Working with the Visual Basic Editor	440
Creating a Module	441
Opening a Module	441
Running a Command Macro from the Visual Basic Editor	442
B Office 2007 Keyboard Shortcuts	443
General Office 2007 Keyboard Shortcuts	444
Word 2007 Keyboard Shortcuts	445
Excel 2007 Keyboard Shortcuts	451
PowerPoint 2007 Keyboard Shortcuts	455
Outlook 2007 Keyboard Shortcuts	457
Access 2007 Keyboard Shortcuts	461
